Use of Profilnine Prothrombin Concentrate (PCC) to Emergently Reverse Warfarin

- 1. Vitamin K 5-10 mg IV
- 2. Profilnine 50 IU/Kg rounded to nearest vial
- 3. If INR > 4, give Factor VIIa 20 mcg/kg (rounded to nearest vial)
 - 4. Repeat INR in 30 minutes

Note: Exsanguinating patients with warfarin-associated coagulopathy should receive FFP in place of PCC
